

## Linear Gestation of the Children from the Promises Fulfilled

If anyone was or is honest with the Word of God, how do they reconcile JUST the children of Fulfilled promises in Leah and finally Rachel and Joseph to be done (ALL shown born) in just seven years! So that when Joseph IS born there is only 6 years for serving for cattle/ wages?

8 years x 12 months = 96 months = 2880 days

7 years X 12 months = 84 months = 2520 days

Reuben: = 10 months = 300

Simeon. = 10 months = 300

Levi. = 10 months = 300

Judah = 10 months = 300  
and left bearing= 1 month

When Leah saw  
that she had left bearing, = 30

Zilpah Leah's maid  
Gad = 10 months = 300

Asher. = 10 months = 300

Leah,  
Issachar = 10 months = 300

Zebulun. = 10 months = 300

total before = 81 months = 2430

7 years fulfilled HERE @ 84 months & 2520 days

(Now there is only 3 months to birth both Dinah and Joseph)

How can Jacob begin to work for his cattle for 6 years at this point if Joseph isn't born yet!

And for that matter, Neither is Dinah!!!

Dinah = 10 months = 300

total w/ Dinah = 91 months = 2730

Rachel (& Joseph born after Dinah)

Joseph = 10 months = 300

total w/ Joseph = 101 months = 3,030 days

(Minus total for = 96 months = 2,880 days

8 years)

---

Months and days = + 5 months = + 150 days

Past 8 years, well

into 9th year

If linear and no co- pregnancy with Leah/ Dinah, Rachel/ Joseph, then Joseph's being born would be well into the NINTH year! And since the last six years start with Joseph being born, that would be 7 + 9 + 6 = 22 years! How can this be? It is much easier to scripturally reconcile or explain the difference from 22 years to 21 years, than it is from 22 years to 20!
